

MALAWI GOVERNMENT

## FRUITS AND VEGETABLES PRODUCTION AND PROCESSING

Malawi's features are suited for the production of fruits and vegetables including oranges, tangerines, paw paws, guavas, mangoes, avocado pears, pineapples, bananas, tomatoes and onions. Fruits and vegetables grow well in Ntcheu, Dedza, Mwanza, Salima districts and the Shire highlands. Besides investing in growing the actual fruits and vegetables, you may also invest in processing, transporting and preserving these items during the peak seasons.
